d Enough Silver Money Now.

Our gold coins are not legal tender in Europe, but they are readily accepted there by weight, as the equivalent of European coins of corresponding weight and fine-mess. No Force Bill in needed to make them acceptable.

The Sherman notes, known officially as Treasury notes of 1859, are legally payable in gold or a legally payable in gold are legally payable in gold are used to the silver, at the discretion of the Section of t

The proportion betw alues of gold and silver is a mercantile problem alto-gether. \* \* Just principles will lead us to disregard legal proportions altogether; to inquire into the market price of gold in the several countries with which we principally be connected in commerce, and to take an average from them. mission should therefore be appointed to inquire what are the proportions between the values of fine gold and fine silver at the markets of the several countries with which we are or probably may be connected in commerce, and what would be a proper proportion here, having regard to the average of their values at those markets, and to other circumstances, and the coinage of gold and silver at our mints should be at the ratio thus determined.

THOMAS JEFFERSON

In case free coinage of silver try, I presume insurance compa nies and all other institution drafts would be paid in silver dol lars or their equivalent, instead o gold or its equivalent, as is now the case.
